

Lucera

Lucera is a tasteful, firm cooking ware potato with a brilliant skin and an extremely high yield. The specific waxy taste makes the variety unique. Due to an exceptionally high tuber count Lucera is ideal for producing baby-potatoes. Because of the variety's excellent long-term storability, it is available all year round.

Cultivation and storage (point of attention)

Seed treatment	Pre-sprouting will give good results and fast emergence
Plot selection	Good soil structure is required to get good tuber shape
Fertilisation	N--- P+ K+ Mg ++ Bo ++
Planting	Wide planting distance and average planting depth
Cultivation	Moderate foliage, but generally well covered
Metribuzin	Seems less sensitive (7)
Harvesting	Harvest when product is mature, to keep the quality
Storage	Dry and reach the right temperature quickly
Handling	No problems with handling
Point of Attention	When the tubers grow bigger, the shape can be a little bit irregular.
